

AUC VPN Configuration steps for iPhone on IOS 7:

1. Select 'Settings' from the main screen.

2. Then select 'General'.

3. Scroll down and select 'VPN'.

4. Choose 'Add VPN Configuration'.

5. At the top of the next screen choose "**PPTP**" then enter the following details:

Description: **AUCVPN**
Server: **vpn.aucegypt.edu**
Account: *your username*
RSA SecurID: **OFF**
Password: *your password*
Encryption Level: **Auto**
Send all traffic: **ON**

At the top right select '**Save**'.

6. Your AUCVPN connection has now been created.

7. Toggle your VPN connection to "**ON**" and you will notice a new VPN symbol appear at the top of the screen, you are connected to AUCVPN.

Go back to the Home Screen and you will notice the VPN symbol is still at the top of the screen, this shows you are still connected to the VPN and any internet browsing you now do will go via AUCVPN.

To disconnect go back to the VPN page and switch VPN to 'OFF'.
