

**STEP 1 - Open the Control Panel on Windows 7 by clicking on Start and then 'Control Panel'**

**STEP 2 - Please click on "Network and Internet". Double click to open it.**

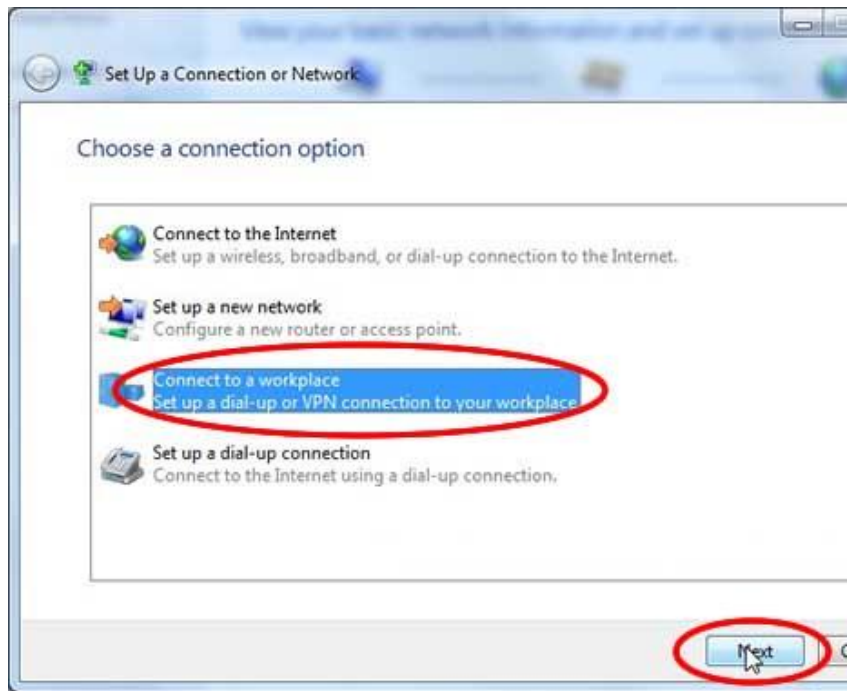

**Step 3 -Next, click on "Network and Sharing Center" as shown in the image.**

**Step 4 - Now, please click on 'Set up a new connection or Network'.**

**Step 5 -On the next screen (Choose the Connection Type) Click on "Connect to a workplace" then click "Next."**

**Step 6 -If asked to use an existing connection select 'No, create a new connection'. Now click 'Use my Internet connection (VPN)'"**

**Step 7 - Now, enter the server information. click to see more important information**

**In the text box labeled 'Internet address' type [vpn.aucegypt.edu](https://vpn.aucegypt.edu)**

**In the text box labeled 'Destination name' give it a name such as [AUC-VPN](#). This is the name of the connection, and will show up in the "Connect to a network" screen when we're done.**

**Make sure that the checkbox labeled "Don't connect now; just set it up so I can connect later" is checked.**

**You can also put a check at "allow other people to use this connection"**

**Then click the "Next" button.**

**Step 8 - Enter your username and password that was sent to you in the VPN activation email & click create.**

Connect to a workplace

Type your user name and password

User name:
